Temiloluwa Odunfa

Full-Stack Software Engineer | React · TypeScript · Java · Spring Boot

Mississauga, ON | (289) 659-6253 | odunifa.temi@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full-stack software engineer delivering production features across React, TypeScript, NestJS, and PostgreSQL, from UI and APIs to data migrations and automated tests. Built multi-tenant workflow interfaces, reporting features, and concurrency-safe backend operations.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, SQL, HTML, CSS

Frontend: React, React Router, Vite, Axios, Formik, Yup

Backend: Spring Boot, Spring Security, NestJS, Node.js, REST APIs, JWT, Socket.io

Database & Tools: PostgreSQL, transactions, migrations, JUnit, Git, GitHub Actions, Docker

PROFESSIONAL EXPERIENCE

Full Stack Software Developer (Contract) | 4RHD Solutions Inc. | Apr 2026–Present

Contribute to AIGuardium, an enterprise AI-security platform, and a hotel property-management system.

AIGuardium — Enterprise AI-security platform

- Resolved a production race condition in a browser extension's real-time redaction flow, from reproduction through regression verification.
- Delivered EU AI Act, NIST AI RMF, and ISO 42001 report templates spanning PostgreSQL migrations, backend logic, React selectors, and shared HTML/PDF data.
- Standardized detection confidence thresholds and introduced regression coverage and a CI-runnable browser-API mock test harness.

Hotel property-management system — Client platform

- Built event-hall and banquet reservation flows from inquiry to confirmation, including deposits and role-based access; implemented atomic booking/deposit logic with in-transaction availability checks to prevent double-booking.
- Delivered in-room device management across REST APIs, a Socket.io gateway, and a React administration interface.
- Added tiered front-desk permissions for keycard encoding and fixed guest folio, room-transfer, and payment workflows with regression verification.

SELECTED PROJECTS

TrackLo — Multi-Tenant Request Platform | Java 21, Spring Boot, PostgreSQL, React, TypeScript

- Built a multi-tenant platform with workspace-scoped access, role-aware views, and a six-stage approval/UAT workflow.
- Prevented duplicate work claims through atomic conditional SQL updates and database uniqueness enforcement.
- Developed 19 React/TypeScript pages for UAT checklists, evidence uploads, sign-off, and retesting.

UserManager — Authenticated Web Application | Spring Boot, PostgreSQL, JWT, React

- Built registration, login, email verification, password reset, protected routes, and administrative user management.
- Developed a social feed with image uploads, likes, comments, and owner-restricted deletion.

EDUCATION & RECOGNITION

York University — BSc, Computer Science | Jun 2024

Top Performer — Black Career Advancement Program, Software Engineering Cohort (BFN / University of Toronto partnership)

Meta Front-End Developer Professional Certificate — Coursera

ADDITIONAL EXPERIENCE

Screening Officer | Canadian Air Transport Security Authority (CATSA), Toronto Pearson Airport | 2022–Present
